

REMARKS

The aforementioned deletions and insertions to the Title Page, Abstract, and the Specification are believed to be in compliance with CFR 1.121. In order to clearly set forth the amended portions of the specification, applicants have enclosed a copy with corrective markings. Please insert the entire rewritten text as it is presented, without corrective markings, in the accompanying replacement copy of the Specification.

The applicants have amended certain descriptions in the Specification and the Claim with the objective of presenting a full, clear and complete description of the cultivar in order to comply with 37 CFR 1.163 and 35 U.S.C. 112 and to overcome the objections listed in the Office Action dated 08/10/2004. Specifically:

In response to the objections set forth in paragraph A of the Office Action, the Specification has been amended to correct the disclosure of the botanical classification of the instant plant.

In response to the objections set forth in paragraph B of the Office Action, the Specification has been amended to clearly state that the parent cultivars are not known. Therefore, applicants are not able to draw a comparison between the female parent plant and the claimed plant.

In response to the objections set forth in paragraph C of the Office Action, applicants state that the female parental cultivar is not known. Therefore, comparative information which distinguishes the instant plant from the parents is not available.

In response to the objections set forth in paragraph D of the Office Action, the Specification has been amended to set forth the age of the observed plants as well as to describe the cultural conditions under which the observed plants were grown.

In response to the objections set forth in paragraph E of the Office Action, the Specification has been amended to set fourth the diameter of the peduncle.

In response to the objections set forth in paragraph F of the Office Action, the Specification has been amended to correct the terminology referring to the tepals.

In response to the objections set forth in paragraph G of the Office Action, the Specification has been amended to state that the flower depth is 5 to 10 mm, not tepal depth.

In response to the objections set forth in paragraph H of the Office Action, the Specification has been amended to clarify the sub heading, under which the coloration of the tepals is set fourth.

In response to the objections set forth in paragraph I of the Office Action, the Specification has been amended to set fourth the tepals base and length as well as the base descriptor.

In response to the objections set forth in paragraph J of the Office Action, the Specification has been amended to clarify the type of measurements set fourth regarding the anthers.

In response to the objections set forth in paragraph K of the Office Action, the Specification has been amended to set fourth stem length and stem diameter.

In response to the objections set forth in paragraph L of the Office Action, the Specification has been amended to provide additional botanical descriptive data referring to the compound leaf size.

In response to the objections set forth in paragraph M of the Office Action, the Specification has been amended to delete redundant text.

In response to the objections set forth in paragraph N of the Office Action, the Claim has been amended for purposes of simplification.

For all the reasons listed above, the applicants respectfully submit that the errors in the Specification are corrected, and that the claims comply with Section 112. The application is believed to be in condition for allowance, and notice thereof is respectfully requested.

Applicants have enclosed a statement under 37 CFR 3.73(b), which establishes evidence that the undersigned is authorized to act on behalf of the assignee, Poulsen Roser A/S.

Respectfully submitted,

A handwritten signature in black ink, appearing to read 'Ken Rynearson', is written over a horizontal line.
